

# How to install a new version of CarScope

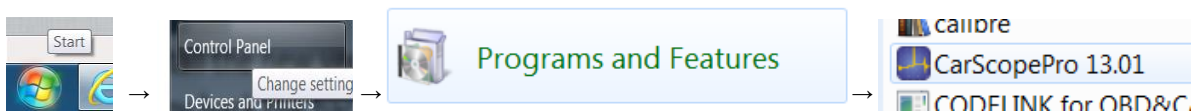

1. If you already have saved measurements and/or waveforms make a backup of the following folders:

“Saved Measurements” and “Saved Waveforms”

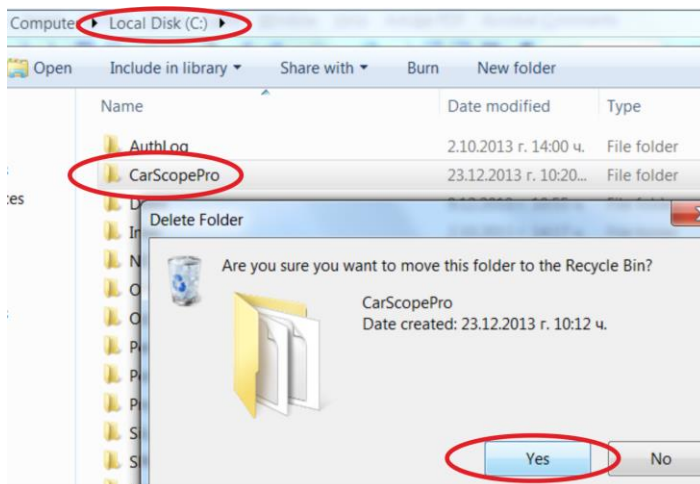

These 2 folders are in C:\CarScopePro\

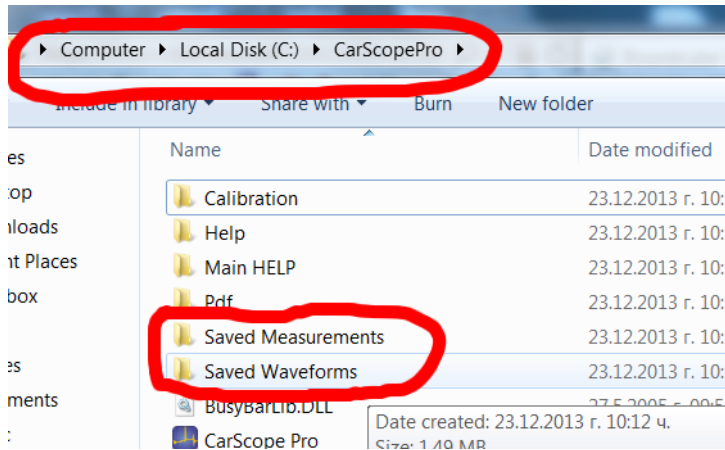

2. Uninstall the old program version from Control Panel

3. Delete the main folder of the program.

4. Install the new version
5. Copy back the backup files to the corresponding folders

5. When you are connecting to the CarScope Pro device for the first time, ensure that the distance between the PC and the device is no more than 2 meters
